Author Index Volume 92 (2001)*

Ahmad, I.A., Moments inequalities of aging families of distributions with hypotheses testing applications (1–2) 121–132
Ben-Gal, I. and L.B. Levitin, An application of information theory and error-correcting codes to fractional factorial experiments (1–2) 267–282
Bhatt, M.B. and S.R. Patel, On asymptotic distribution for two-truncation parameter family (1–2) 39– 46
Braekers, R. and N. Veraverbeke, The partial Koziol–Green model with covariates (1–2) 55– 71
Butler, N.A., Properties of optimal polynomial designs under smoothing spline models (1–2) 259–266
Chan, N.N., *see* K.-H. Li (1–2) 253–257
Chao, A., P.S.F. Yip, S.-M. Lee and W. Chu, Population size estimation based on estimating functions for closed capture–recapture models (1–2) 213–232
Chen, Z., Ranked-set sampling with regression-type estimators (1–2) 181–192
Chu, W., *see* A. Chao (1–2) 213–232
Dass, S.C., Propriety of intrinsic priors in invariant testing situations (1–2) 147–162
Deshmukh, S.R., *see* M. Kale (1–2) 111–119
Di Bucchianico, A., *see* M.A. van de Wiel (1–2) 133–145
Ferger, D., Exponential and polynomial tailbounds for change-point estimators (1–2) 73–109
Goos, P., L. Tack and M. Vandebroek, Optimal designs for variance function estimation using sample variances (1–2) 233–252
Hadjicostas, P. and G.C. Hadjinicola, The asymptotic distribution of the proportion of correct classifications for a holdout sample in logistic regression (1–2) 193–211
Hadjinicola, G.C., *see* P. Hadjicostas (1–2) 193–211
Hawkins, D.L., A proof of the asymptotic normality of the inverse sampling estimator in finite population sampling (1–2) 175–180
Hu, C.-Y. and G.D. Lin, An inequality for the weighted sums of pairwise i.i.d. generalized Rayleigh random variables (1–2) 1– 5
Isogai, E. and C. Uno, Improved sequential procedures for estimating the percentile of a normal distribution (1–2) 163–174
Janssen, A., Testing nonparametric statistical functionals with applications to rank tests [J. Statist. Plann. Inference 81 (1999) 71–93] (1–2) 297
Kagan, A. and R.G. Laha, A property of linear forms of independent random variables related to uniqueness of linear structure (1–2) 13– 20
Kagan, A., A discrete version of the Stam inequality and a characterization of the Poisson distribution (1–2) 7– 12
Kale, M. and S.R. Deshmukh, Estimation in continuous state-space branching processes (1–2) 111–119
Laha, R.G., *see* A. Kagan (1–2) 13– 20
Lee, S.-M., *see* A. Chao (1–2) 213–232
Levitin, L.B., *see* I. Ben-Gal (1–2) 267–282
Li, K.-H. and N.N. Chan, L_p-optimality for regression designs with heteroscedastic errors (1–2) 253–257
